## Experience

---

### **Africhange Tech/ Frontend Engineer**

AUGUST 2022 - PRESENT, REMOTE

As a frontend developer in the fintech company, I work extensively on the admin web app making it easy for customer success staff and management to resolve customer complaints quickly. My work so far has helped the company achieve its growth targets.

### **Evolutics Tech / Frontend Engineer**

JUNE 2021 - JULY 2022, REMOTE

As a frontend developer in the startup, I was responsible for mapping out new features with management, building new functionalities and communicating with the backend team about API needs. The product is an enterprise application being developed to disrupt an established industry.

### **Telixia Ltd / Software Engineer**

OCTOBER 2019 - JUNE 2021, REMOTE

This was a software agency. It was exciting building full-stack applications with different frontend and backend technologies.

Projects I led here include:

- Courier service app (ReactNative, NodeJS, MongoDB)
- School portal (Angular, ExpressJS, MongoDB)
- A free IP television service (Reactjs, NodeJS, streaming APIs)

### **Pocosoft Consults / Software engineer**

JUNE 2017 - OCTOBER 2019, ONITSHA

Directed and created full-stack web apps using bleeding-edge, modern technologies and frameworks for businesses and individual clients.

### **Soleks Technologies Ltd / Computer Instructor & Graphics Designer**

JANUARY 2015 - JUNE 2017, ABA

- Teaching Microsoft Office applications, graphics design and photo editing, computer programming and web design.
- Edits photographs, and designs graphics for large-format printing
